

PROFESSIONAL SUMMARY

Manufacturing and operations leader with experience scaling production systems and leading cross-functional initiatives across manufacturing, supply chain, inventory, logistics, and quality. Proven record reducing cost and improving delivery, assembly efficiency, inventory accuracy, and product quality through Lean Six Sigma, structured problem solving, ERP implementation, and data-driven decision making. Experience spans automation and robotics manufacturing, power-generation equipment, and high-volume production operations.

PROFESSIONAL EXPERIENCE

Operations Manager | *Retiina LLC, Baltimore, MD*

Feb 2025 - Present

- Lead end-to-end operations spanning manufacturing, supply chain, inventory, warehousing, and logistics for custom automation systems.
- Own multiple operational initiatives simultaneously, coordinating priorities, resources, schedules, risks, and cross-functional dependencies from planning through execution.
- Develop production, capacity, inventory, and shipment plans to align manufacturing output with customer commitments and changing business requirements.
- Improved on-time delivery from 89% to 95% by strengthening production planning, shipment coordination, and early identification of execution risks.

Manufacturing Manager | *Retiina LLC, Baltimore, MD*

Mar 2024 - Feb 2025

- Led daily manufacturing operations for custom automation and robotics systems with responsibility for production execution, quality, material readiness, schedule, labor allocation, and cost performance.
- Reduced operational costs by 12% by applying Lean manufacturing principles, eliminating non-value-added activities, and improving production workflows and material flow.
- Led Sage ERP implementation across manufacturing operations, translating business processes into structured workflows and coordinating rollout, training, and adoption.

Industrial Engineer | *Wildcat PowerGen, Wichita, KS*

Dec 2023 - Mar 2024

- Developed standardized video-based work instructions for generator assembly, reducing assembly time by 11% and improving operator consistency and training effectiveness.
- Reduced generator assembly defect rates by 8% through root-cause analysis, targeted quality improvements, and corrective action implementation.

Quality Engineer | *Retiina LLC, Baltimore, MD*

May 2022 - Jul 2023

- Improved manufacturing efficiency by 54% and reduced build time by 43% by leading Lean Six Sigma (DMAIC), Value Stream Mapping, Kanban, and process optimization initiatives to eliminate production bottlenecks.
- Strengthened quality and supplier performance by implementing a defect data collection system that reduced recurring defects by 13%, conducting supplier audits, introducing Poka-Yoke solutions, and developing automated Excel dashboards.

Maintenance Engineer | *United Spirits (Diageo), India*

Dec 2020 - Jul 2021

- Increased production throughput by 9% by supporting an S-path conveyor modification that reduced bottle back pressure and equipment wear.
- Supported preventive maintenance and production-equipment reliability activities to reduce unplanned downtime and maintain bottling-line continuity.

EDUCATION

Rochester Institute of Technology (RIT)

Master of Science, Manufacturing and Mechanical Systems Integration

Rochester, New York

Marathwada Institute of Technology

Bachelor of Technology, Mechanical Engineering

Aurangabad, India

SKILLS

Manufacturing & Operations: Lean Manufacturing, Lean Six Sigma, Continuous Improvement, VSM, Kaizen, Root Cause Analysis, Production Planning, Capacity Planning

Program & Quality: Cross-Functional Leadership, NPI, Project Execution, Risk Management, PFMEA, SPC, PPAP, Supplier Quality, KPI Tracking

Systems & Analytics: Sage ERP, Advanced Microsoft Office (Excel, PowerPoint, Word), Power BI, Minitab, JMP, AI Productivity Tools
